

New Blade contract price for H/Friesian cattle producers

A new contract opportunity is now available to Blade finishing units.

Forward contract price of +20 p/Kg dwt.

The Forward contract is designed to be available for both steers (up to 30 months) and bulls (up to 16 months). There is a readily available source of 3 month old H/Friesian bull calves coming through the Blade calf rearing units to supply finishing units, and contracts will be based on 20 p/Kg dwt over the Abattoir weekly base price on the day of sale.

With cereal and feed prices now at a more reasonable level, and this improved price for finished cattle, there is once again a very good opportunity to feed and finish H/Friesian cattle.

Please contact us for more details on pricing of calves, and the target specifications for the finished cattle.
